KEY SKILLS

Back-End Development:

- *PHP & Laravel Framework*
- **Building & Testing APIs**
- **Authentication & Authorization**
- Database Management & Relationships

Front-End Development:

• **React.js, Redux, Redux Toolkit, React Router**

- Material UI, Bootstrap
- **Responsive Web Design**

Other Technologies:

- HTML, CSS, JavaScript

PROFILE

Full-stack developer specializing in Laravel and PHP for the backend and React.js for the frontend. I have experience developing embedded systems, building APIs, and managing authentication using JWT. In addition to working with popular Laravel libraries such as Spatie Media, Spatie Permission, and Socialite, I also have experience with React.js to create interactive UIs using Material UI, Redux, and React Router. Ability to test APIs using Postman and manage migrations, models, controllers, and factories.

EDUCATION

Aleppo University

Faculty of Information Engineering Software Engineering
Department in Fifth year
